Supplementary Information 3

Genome sizes (C-values expressed as weights of haploid nuclei in picograms) per species used in this study. Mean, median, standard deviation (SD) and minimum and maximum values are given as well as the number of individuals per species (*n*). Whether genome size estimates have been generated *de novo* (this study) or have been retrieved from the genome size database (gsDB; www.genomesize.com) is indicated.

Species	Order	Family	n	Mean	Median	C-value (pg) SD	Min.	Max.	Source
Allophryne ruthveni	Anura	Allophrynidae	2	2.077	2.077	0.135	1.982	2.173	this study
Alytes cisternasii	Anura	Alytidae	1	6.700	6.700		6.700	6.700	gsDB
Alytes dickhilleni	Anura	Alytidae	3	11.076	11.496	0.973	9.963	11.768	this study
Alytes muletensis	Anura	Alytidae	1	4.282	4.282		4.282	4.282	this study
